Choose a Block to insert ―

Default Label will appear when chosen

Select Location for Block Page 2, Page 3 or Cross-Section

Determines text height and scale of block (if applicable)

Customize the SeptiCAD Block Library Add, Edit, Delete or change order of list.

Force a particular font height for the Label ―
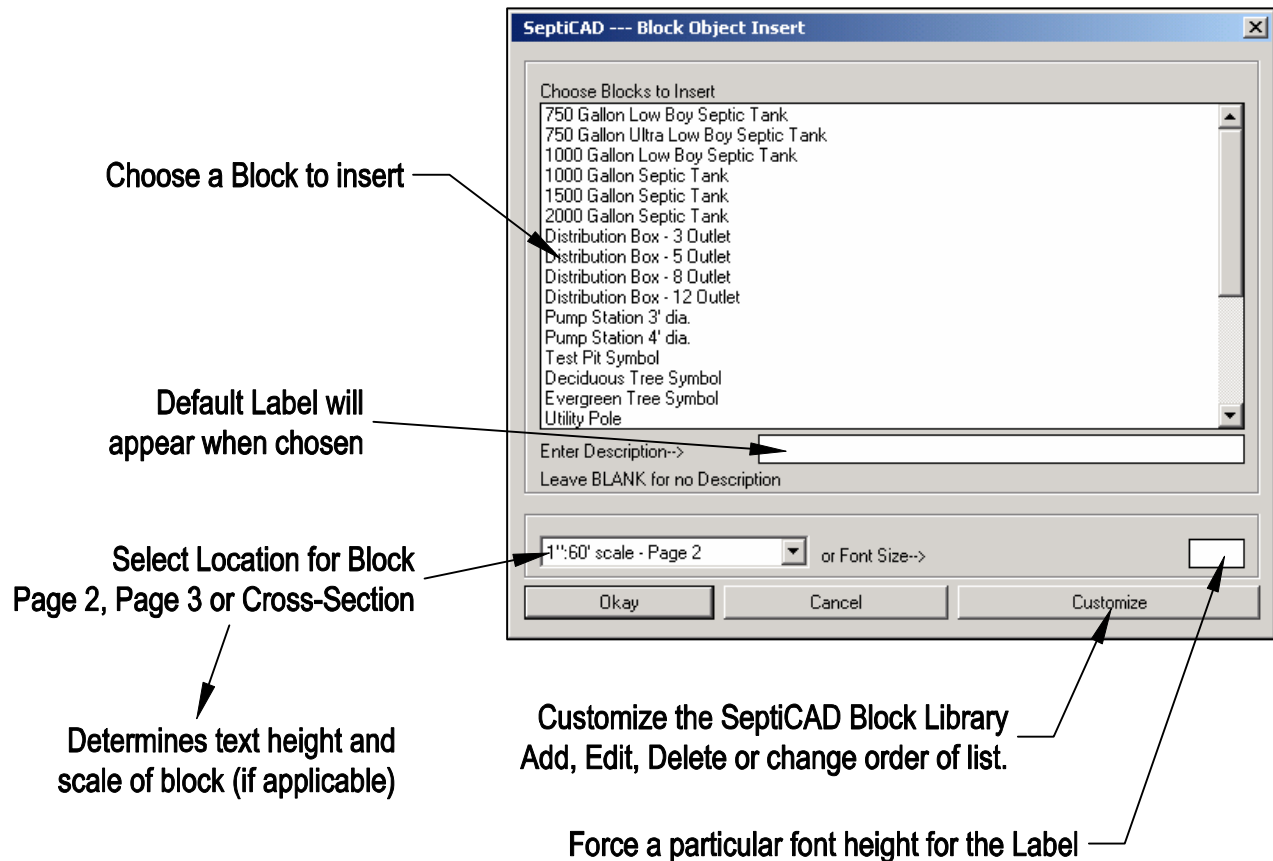

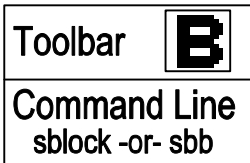

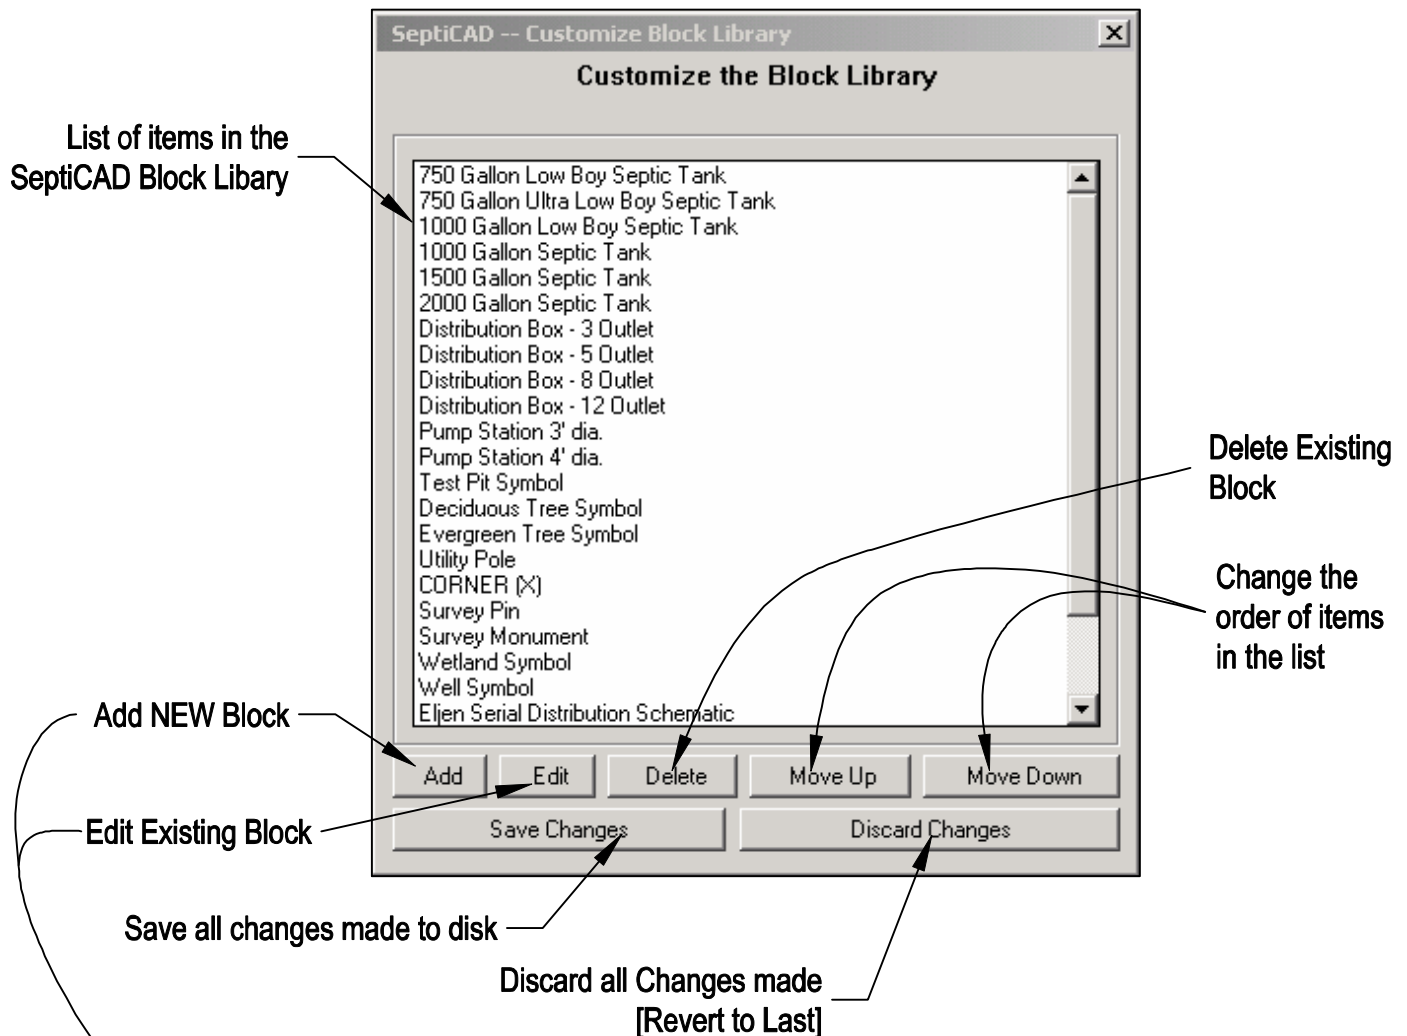

Each SeptiCAD Block Library Item is inserted is dependent on the type of object (e.g. test pit symbol -vs- septic tank). To use the tool follow the steps below:

(1) Select an item and where you want to insert the block.
(2) Press OKAY button
(3) The program automatically changes to MODEL space and asks for a point to insert the block.
(4) For some items, such as a septic tank or D-box, the user will be prompted to rotate the object.
